<p style="text-align: center;">Steps</p> <ul style="list-style-type: none"> ● Use the DNA test request form found below and select that you already have cards on hand ● Save request as an .xls or .xlsx to your computer ● Email dna@simmgene.com and attached the saved request form ● Wait for order confirmation and appropriate paperwork before mailing samples to lab 	<p style="text-align: center;">Steps</p> <ul style="list-style-type: none"> ● Use the DNA test request form found below and select that you do not have cards on hand ● Save request as an .xls or .xlsx to your computer ● Email dna@simmengen.com and attach the saved request form
<p>The ASA DNA Department will use this form to create your order at the lab. You will be emailed an order receipt that must be printed and mailed with your samples to the lab.</p>	<p>The ASA DNA Department will use this form to assign each animal (and their corresponding DNA tests) to a specific blood or hair card.</p>
<p>Please Note:</p>	
<ul style="list-style-type: none"> ● The GGP-100K panel is required to approve all AI sires and donor dams. ● All herd sires, AI sires, and donor dams must be tested for genetic conditions if they are a potential carrier. ● A small percentage of DNA samples fail testing meaning no results can be obtained. The member is financially responsible for the failed test(s) and any new test(s) ordered. ● Blood is not an acceptable sample method for twins. Please submit hair or tissue samples on all twins or suspected twins. <p>* ASA accepts blood cards, hair cards, and tissue samples from any association or lab. Barcode numbers are required for submission, unless the card does not have a barcode (e.g. AGI blood cards or semen straws). For cards without a barcode, please indicate "<u>no</u></p>
